

Less than 100 days until the 24th World Energy Congress starts!

Less than 100 days to the 24th World Energy Congress

In September 2019, the world's energy leaders will meet at the [24th World Energy Congress](#) in Abu Dhabi to determine a course of Energy prosperity for nations, companies, societies, the environment and individuals. Conference sessions will bring together both established experts and thought leaders from across the globe. With less than 100 days we aim to make this a truly memorable and well-attended Congress, welcoming delegates from the entire energy spectrum. [Read and View more](#)

Power-to-X Innovation Forum

On June 17th 2019, the World Energy Council held its first Innovation Forum on P-to-X, closely working with its German Member Committee. The event, hosted by Norton Rose Fulbright, brought together over 50 energy leaders from 10 countries. During the day-long event, moderated by Dr Angela Wilkinson, participants shared expertise, ideas and concrete proposals to mainstream P2X as an enabler of decarbonisation. [Read more](#)

Hydrogen Webinar

On June 26th, the World Energy Council held a webinar presenting the results of its latest Innovation Insights Brief on hydrogen. During the webinar, the experts answered a series of policy, technical and safety questions from the audience. The questions ranged from the opportunities and limitations of blending hydrogen with natural gas to safety concerns surrounding hydrogen. You can watch the whole webinar on our YouTube channel. [Read more](#)

WHAT IS HYDROGEN?

LIGHTEST AND MOST ABUNDANT

Hydrogen is the first element in the periodic table. It is the lightest, most abundant and one of the oldest chemical elements in the universe.

NEVER ALONE

On Earth, hydrogen is found in more complex molecules, such as water or hydrocarbons. To be used in its pure form, it has to be extracted.

FUEL OF STARS

Hydrogen fuels stars through nuclear fusion reaction. This creates energy and all the other

Estonia: Data is New Oil

Estonia: Data is the New Oil

On June 13, 2019, World Energy Council Estonia organized a high-level event on the topic of energy and IT developments. World Energy Council Estonia brought leaders of the energy and IT sectors together in Tallinn for the event called “Estonia: Data Is the New Oil.” The event was focused on using modern technology and IT solutions in the energy sector. How to best exploit different types of data, regularly collected by the energy companies, was the central theme.

Advanced Management in Energy Program: energy literacy for managers

**Advanced Management in Energy
Energy literacy for managers**

The Portuguese Member Committee is very pleased with the conclusion of the 2nd AMEG - Advanced Management in Energy, a program performed in partnership with AESE Business School. As energy became a factor influencing many aspects of everyday work and decisions for managers and senior executives from the most diversified sectors, understanding the energy system structure and its functioning is a needed plus-value.
